

Mel Piper, Scotland Ministries

This is a list of appliances that we will be looking at when we get to Scotland. At the end you will see some web sites. Check them out for updated pricing. We show you what they cost in Scottish pounds and then American dollars. Ladies (and Brothers) if you could help my husband and me. I would appreciate it. Thanks, Sister Mel

Refrigerators are small and with little freezer space. We want to purchase a freezer to store things when on sale because food is so expensive. Most friges are only 24 inches wide by 60 inches tall and not very deep. You have no room in most Scotland homes for larger refrigerators, washers, dryers or even stoves. They like the larger American style appliances and are beginning to build for that need, but supply of these homes are small.
